Re: Submission on Consultation Paper on the Motor Vehicle Safety Act 1989

To whom it concerns:

RVM Australia – Recreational Vehicle Manufacturing Association of Australia – is the peak body for Australia’s RV manufacturing industry representing over 90% of major Australian RV manufacturers. It is the successor to RVMAA, the Recreational Vehicle Manufacturers Association of Australia.

It represents the industry in the key areas of ensuring high production standards, supporting initiatives in training and technology development, and engaging at a national level with government and regulators on policies and regulations affecting the RV manufacturing industry.

RVM Australia’s accreditation programs require all RVs produced by members to comply fully with all safety regulations, including Australian Design Rules and Australian Standards in addition to our own codes of practice.

RVM Australia welcomes the opportunity to make a submission on the consultation paper on the *Motor Vehicle Safety Act 1989*.

We trust our submission will be considered favorably and we look forward to working co-operatively with the review team to ensure that the outcome of the review creates a “level playing field “ where Australian RV manufacturers and importers alike are treated equally from a compliance perspective.

With kind regards
RVM Australia Ltd
