

## Submission 29: RVS Legislation Consultation

Attention Ms Sharon Nyakuengama  
General Manager  
Vehicle Safety Standards Branch  
Australian Dept of Infrastructure and Regional Development  
Canberra Australia

Hello Sharon

In respect of the public consultation of this review I wish to further submit as follows;

1. ADR approved Test facilities worldwide with ADR approvals granted to the respective facility be published.
2. Government vehicles with IPA fitted and not for re-sale to the public not be included in any public register.
3. Rare LHD Exotic cars under SEVS to require no more than a badge change to be included as a Variant. Example Ferrari La Ferrari and the La Ferrari Aperta and Bugatti Veyron and Grand sport and Super Sport. These badge/variants have significant value differences and hence each badge/variant are suited to the scheme as a variant.
4. All manufacturers to supply EU Certificate of Conformity (currently done in EU) or equivalent Japanese documentation for all new vehicles sold in Australia upon purchaser's request prior to purchase or within 7 days after delivery to facilitate low cost re-export and use of cars for public road use in overseas jurisdictions.

Should you require any explanation re above then please email or call me.

Thank you in advance for considering this submission.

Kind regards  
Evan Simeon
