

Submission 31: RVS Legislation Consultation

Good morning I am writing to your re the changes to the Raws Laws re heavy vehicles being excluded for the new format

Our motor industry has been devastated recently as you would know.

The Raws system is a self supportive industry it contributes hundreds of millions of dollars in taxes and though work being carried out by suppliers supports 1000 of jobs.

To exclude heavy vehicles will put a lot of people out of work who have created there life around these vehicles on I believe the bases of safety is utter rubbish.

Any body who is involved in the industry knows full well the quality of the work carried out to meet the raws system is second to none any were in the world.

I would suggest its manufactures once again dictating to the government and a government taking no time to investigate what is right.

It would seem small business in this country for some is doomed.

regards

David King
