

## Submission 84 – RVS Legislation Consultation

hello,

because the sevs scheme has been successful i have purchased several imported vehicles over the past 7 or 8 years (delicas, elgrand, 4wd hiace)

why?

because i have four (now teenage kids) and we like towing our campervan on dirt roads like the plenty hwy or birdsville track to visit outback towns, national parks and other significant locations

the elgrand (particularly the e50, and mitsubishi delica & D5) are unique because not only can you take the 6 people in comfort (ie the big sliding doors makes entry & exiting easy; not fiddly, cumbersome or acrobatic affairs like they are in 'normal' suvs). Additionally these vehicles have AWD AND importantly a decent sized BOOT (unlike every other SUV).

I would like to make a submission because i think politicians are easily swayed by the 'new vehicle sales' lobby groups and dont listen to what people need.

if toyota wont sell more hybrid vehicles here like estima, kluger, alphard, IQ, thats their decision, why should i have to suffer?

these vehicles comply with ADR despite all the white noise that comes from toyota australia suggesting "millions of deathtraps"

Why is it ok in New Zealand but not Australia? The new Minister seems like a complete laggard.

regards
