

Submission 16 – MVSA Review 2014

To whom it may concern,

This is Sam writing from SKYEYE in Taiwan, we are specializing in SI (system integration) and TSP (Telematics Service Provider) in automotive software. How are you?

I was told that your department is in charge of MVSA (Motor Vehicle Standard Act); and we were also forwarded with your department's info from ANCAP (Australian New Car Assessment Program) and TAC (Transport Accident Commission).

Sorry for bumping into like this; but we are just wondering if Australia has an expansionary need on driving safety concern with collaboration of insurance companies or any other third party.

Because we know that Europe is taking this concern really seriously, and our client in UK has just finished signing contracts with local 3 largest insurance firms, which are QBE, RSA and Alliance; and we are about to initiate the services there.

Therefore, I was asking ANCAP and TAC about this matter and they've forwarded this department info to us. It would be great if you could take a look of the attachment which is our system's structure and basic intro.

Looking forward hearing you soon.
Thanks.

Best Regards.

Sam
